OverSite™ VMS

More About OverSite™ VMS

Features:

- Web-based sign control
- Custom Messages in Real Time
- Library Management
- Timed or indefinite display
- Multiple connected signs

Intelligent Variable Message Sign Control, Anywhere, Anytime

Communicate Clearly. Respond Quickly.

OverSite™ VMS is Harding Traffic's secure, web-based platform for remotely managing Variable Message Signs. From one interface, operators can select connected signs, create or recall messages, and activate roadside information without travelling to site.

Designed for roadworks, temporary traffic management, changing road conditions and public safety information, the platform supports both rapid message updates and consistent messaging across multiple connected signs.

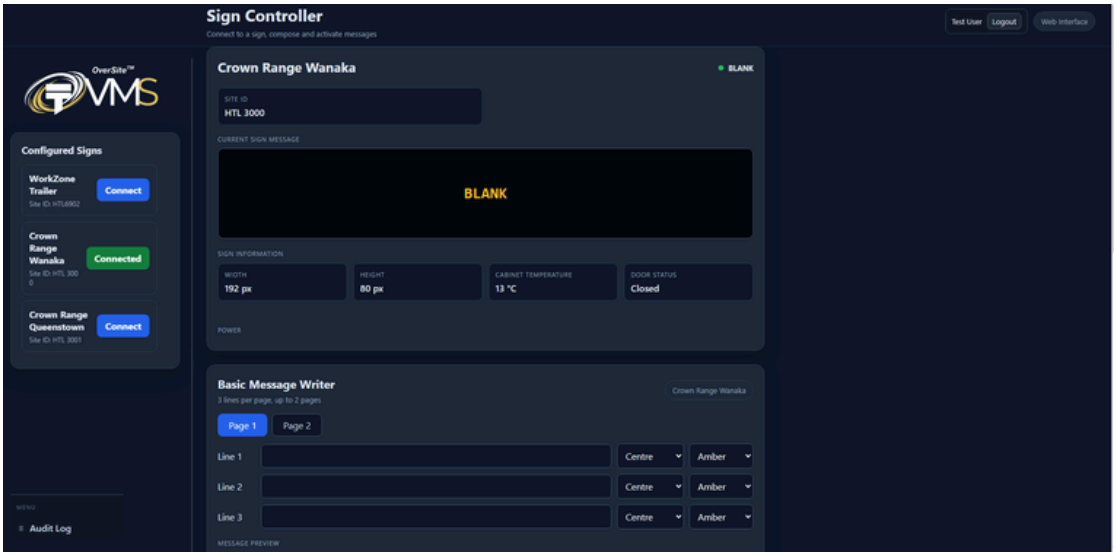

Users can choose message colours and alignment, set timed or ongoing displays, and save commonly used messages for future activation. Compatible signs also support switching between VMS and Speed Indicator Display (SID) modes.

OverSite™ VMS

Key Features That Set OverSite™ VMS Apart

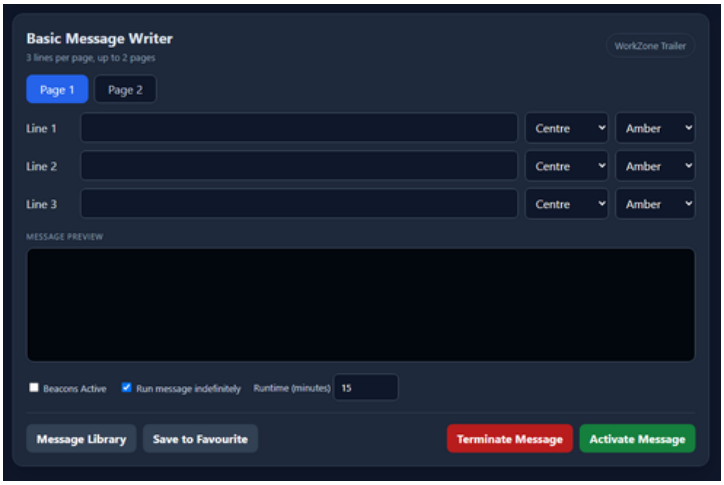

Centralised Control Across Multiple Sites

Connect to individual Variable Message Signs from a single web interface, with a clear list of configured signs and visual confirmation when a device is connected. View the current display and available sign information before sending a new message, helping operators manage signs confidently from wherever they are working.

Create and Activate Messages in Minutes

Compose single-page or two-page messages using the built-in message writer. Set text alignment and available colours for each line, preview your content and choose whether it runs for a set duration or indefinitely. Activate or terminate messages remotely as conditions change. timetable.

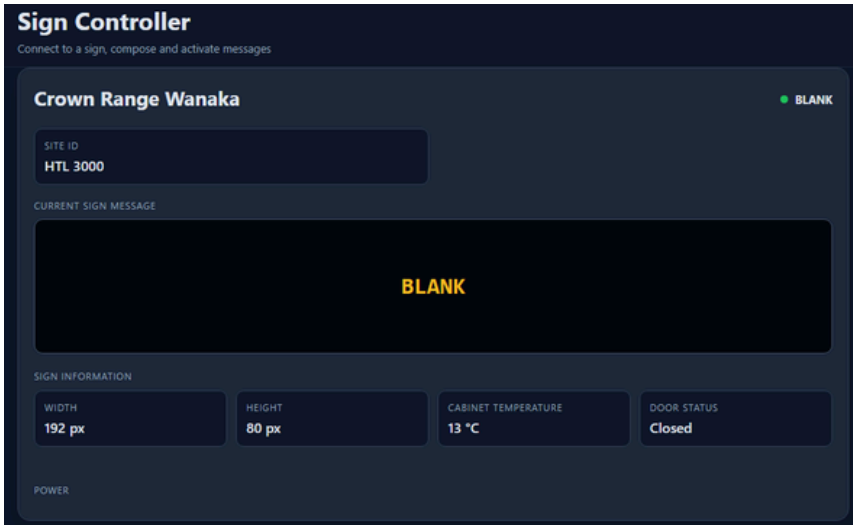

Access and Accountability

Authorised users can access their configured signs and review recorded activity through the Audit Log, supporting clearer oversight of sign operation.

Key Features That Set OverSite™ VMS Apart

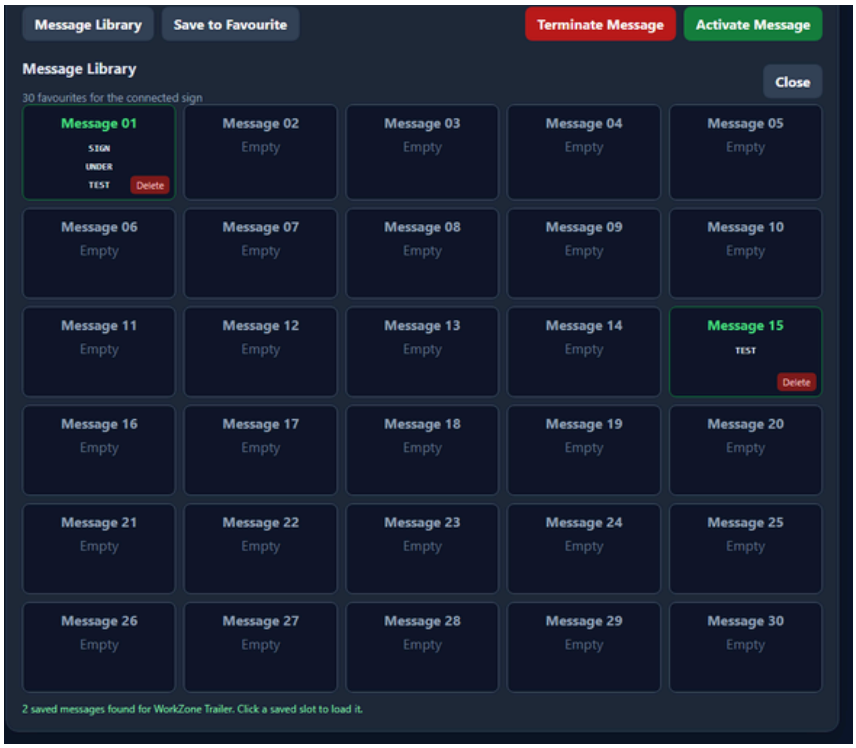

Live Sign Visibility and Operational Information

See the selected sign's current message and available operating information in the control centre. Connected devices can display details such as sign dimensions, cabinet temperature and door status, providing a convenient overview before making changes to the roadside display.

Saved Messages and Quick Activation

Keep frequently used messages ready for repeat use with a dedicated library of 30 favourites for each connected sign. Simply open the library, select a saved message and load it into the writer for activation.

About

Intelligent Traffic Management Systems

At Harding Traffic, we are more than just a company; we are pioneers in traffic control solutions with a rich history dating back to 1966 when Harding Signals was incorporated. This marked our venture into electronic traffic signals.

In 1997, our area of operations moved away from Traffic Signals and into Electronic Signage and Traffic Management Systems. To reflect this, we changed our name to Harding Electronic Signals Ltd. Harding Traffic's integration into the Traffitech Group in 2007 marked a new era of growth, joining a group of companies boasting a robust financial standing with $45 million in revenue, assets exceeding $20 million, and a dedicated team of 180 staff and 6 locations across New Zealand.

Our journey has been marked by a steadfast dedication to innovation and quality, leading the charge in traffic control technology. With 1000's of the country's traffic signs installed by Harding Traffic over 28years, our impact is undeniable. Yet our ambition extends beyond electronic traffic signs; we've become a comprehensive provider of traffic management/warning systems, car park solutions, integrated traffic management solutions, data capture and analytics along with so much more. We are committed to enhancing urban infrastructure with our cutting-edge solutions

Quality Guaranteed

Harding Traffic holds AS/NZS 4801 Health and Safety Management certification, ISO 9001 manufacturing quality certification and ISO 14001 Environmental Management System certification. These certifications represent Harding's commitment to providing a consistently high level of service, delivery quality products based on sound management and process controls.
